## Zip Slot Mortiser

### Features

The Zip Slot Mortise Mill utilises a bearing guided drill bushing mounted into a carriage assembly. The carriage slides back and forth on two shafts while guiding a hand drill equipped with a special mortising drill bit. The drill bit is inserted into the bushing and forms a rigid support that acts as a spindle assembly and allows you to easily mill clean, crisp slot mortises in hard and soft woods.

### What's in the Box
