## 6" ShearTec II Jointer

**LAGUNA**

### Features

6 row ShearTec II helical cutterhead

Deep gullets in the head allow chips to exit fast & keep the machining area clear of chips

42 four-sided German carbide helical cutter inserts set into the head on a flat landing surface which allows more torque to be applied when fixing

Inserts are slightly angled to give a shear type cut with low impact and less kick-back action

Insert leading edge crowned to prevent lines appearing

6 rows of cutters in each head for premium results

1422mm long bed allows for longer work pieces

Enclosed steel stand
